## Spawning Modes

Allstar Anglers

### Pre Spawn-Spawn-Post Spawn

The May Opener on the Michigan Waters of Lake Erie, found most Smallmouth in A Post Spawn Mode. A few seemed to be in Pre Spawn mode including a 5.06 lbs Lockeman's Big Bass Winner. A majority of the Bass weighed in were Bedding Smallmouth Males. A surprising number of Pre-Spawn Largemouth were also weighed. The weather could be responsible for the smaller weight limits. We had an early warm up in late April through the beginning of May giving some Smallmouth a chance to Spawn around the Full Moon of May 8 to the New Moon of May 24. The rest of the Smallmouth and most of Largemouth seem ready to Spawn now on the June 7 Full Moon to the New Moon of June 22. The cooler than normal High Temperatures recently could play an important role for the Upcoming Canadian Opener June 27. Look for an extended Post Spawn Period. Good Luck on Larger Limits.

### *Allstar Anglers Winners May 30*

---

John Marchbanks and Jason White  
First Place 19.21lbs...Won \$1,000.00

John and Jason were part of the Brest Bay Brigade. They found the fishing slow and abandoned Tubes early in their day. They went to Dropshot Rigs using Gulp Watermelon Gobbies. The change paid off as they started to land some decent Bass. As afternoon approached they found themselves with a respectable limit, still needing to get rid of a couple of dinks. As luck would have it they were able to cull out their last 2 shortly before 2:00pm. All their Bass came on subtle rises in 12 to 14 feet of water. I want to personally thank John who does a great job as our Weigh Master and Jason who is responsible for the Live Release of all our Bass. Thanks Again for your Help and Support!
